## **BRAKE FLUID RESERVOIRS WITH FLUID LEVEL WARNING**

Earl's Australia now offers two brake fluid reservoirs with electrical fluid level warning possibilities. Single and twin outlet versions are available.

Both have Push-On outlets for 5/16 hose, and electrical connection may be made by female spade connectors. The single outlet reservoir has a mounting bracket.

Use of these reservoirs is suggested when it is a legal necessity to have a warning light on the dash indicating low brake fluid level.

Part Numbers are:

Single outlet FLIRES 1

Twin outlet FLIRES 2

FLIRES 1

FLIRES 2
