

## Coloured -3 Teflon-lined Hose

We now offer you a choice of exterior colours for the plastic coated 1/8" bore -3 "Speed-Flex" Stainless Steel braided Teflon lined hose commonly used for braking systems, pressure gauge lines etc.

In Red, Blue, Purple, Yellow, Black and Green, plus a "Carbon Fibre" look, you can now tailor the lines to enhance the car, boat or motorcycle you are fitting them to, or colour code the hydraulic system.

Standard uncoated hose, and hose with a clear plastic cover are of course still very much available! As is antistatic carbon lined hose.

All the hoses are used with our standard range of Speed Seal Hose ends. Just remove about 10 mm of the plastic covering with a Stanley Knife or similar to allow the socket nut to slip over the underlying braid and then assemble in the normal manner.

Part Numbers follow. All our hose is sold per metre, but there is no minimum order quantity at all.

HOSE DESCRIPTION	PART NUMBER
Blue Hose	500003BU
Carbon Fibre look hose	500003CA
Green Hose	500003GR
Purple Hose	500003PL
Red Hose	500003RD
