

STAINLESS STOP LIGHT SWITCH FITTING

To assist in adapting a brake stop light switch to some Harley Davidson - and other - lines, Earl's Australia offers a stainless steel stop light switch fitting, part no 6453000.

The fitting consist of a body complete with hose ends each side for direct attachment of -3 Stainless braided Teflon™ lined hose, a port drilled 1/8 NPT to accept many standard brake stop light switches and a stainless steel mounting bracket. The bracket may not fit all applications, but may be carefully bent, drilled or otherwise modified to assist in installation.
