

## COMPONENTS AND ACCESSORIES

### EARL'S ALUMINUM VISE JAWS FOR HOSE ASSEMBLY

THESE HANDY vise jaw liners help prevent scratching of anodized aluminum hose ends during assembly. Internal magnets hold the extruded aluminum liners securely to most popular bench vises. The jaws are available in both of the standard jaw widths and are designed to hold almost any soft part without marking its surface.

### EARL'S EZ-BEADER™ TUBING BEADER

Patent NO. 5,186,033

EARL'S patented EZ (ROLLER) BEADER is a fresh approach to an old problem. In order to securely attach rubber water hose to rigid aluminum tubing, the end of the tubing must be beaded. Compact enough to be used on already installed tubing, Earl's EZ-BEADER produces a properly positioned and perfectly radiused bead on aluminum tubing with wall thicknesses from .035" to .065". This is one tool that no serious racing mechanic can afford to be without.

### PRESSURE TEST KITS

EVERY HOSE assembly should be pressure tested prior to installation. Earl's PRESSURE TEST KIT makes it easy to test field-assembled kits with either compressed air or nitrogen. Consists of fitting with air valve in each size and matching plugs.

Covers sizes 3 through 16.
