

# FUEL PUMPS

## 600-A

Ideal Fuel Pump for Street Rods, Muscle Cars, Imports/Tuners, and Off Road Trucks

### Features

- Extremely quiet
- Smooth, precise fuel delivery
- Extremely low current draw
- Self Priming
  - Pump may be mounted above fuel cell
  - Vertical or horizontal mount
- All internal wear components are 100% metallic
  - No plastics or composite materials are used in the 600-A pump. This results in the longest lasting, highest quality, most durable flow through pump available.
- The housing is made from corrosion resistant 304 brushed stainless steel
- Weldon anodized gold billet end caps with No-Leak seals.
- -8 inlet and -6 outlet leak free o-ring ports
- 5.25 lbs
- Two stainless steel T-bolt style clamps included with each pump
- Long life, continuous duty

### Maximum Horsepower

- For injected engines up to 600 hp
- For carbureted engines up to 700 hp

### 600-A @ 14 VDC on gasoline

Each Weldon Pump is shipped with a unique serial number and performance chart

### Current Fluids

Compatible with gasoline

### Comments

Requires appropriate bypass regulator, a -6 return line is recommended. See pg 14

### Dimensions
