

# AERO 200 CAPS

The 80 mm Flange Diameter Aero 200 caps are the smallest in the range. They are of all metal construction, so are suited to use with more hostile fluids.

Earl's supplies the basic A26S cap complete with a fixing ring to assist in direct to tank mounting. A gasket is supplied, and with "wet" installations such as Motorcycles and Boats we recommend use of a sealant such as "Hylomar".

There is no locking version of the Aero 200 cap. Illustrated below are the basic cap and the cap with 50 mm neck.

**AERO 200 CAPS**
